# CREATURES
from the past

Toulouse, June 3, 2016. Oreakids, French publisher of edutainment applications, is pleased to announce the immediate availability of « Creatures from the past », interactive encyclopedia developed for iPad™, in French and English language.

Our journey through time begins 443 million years ago, well before the dinosaurs ruled the Earth. Life was abundant and strange creatures inhabited the seas. Prepare to meet some amazing animals that are now extinct. Giant insects, huge sharks and massive snakes: it's time to meet these fantastic animals!

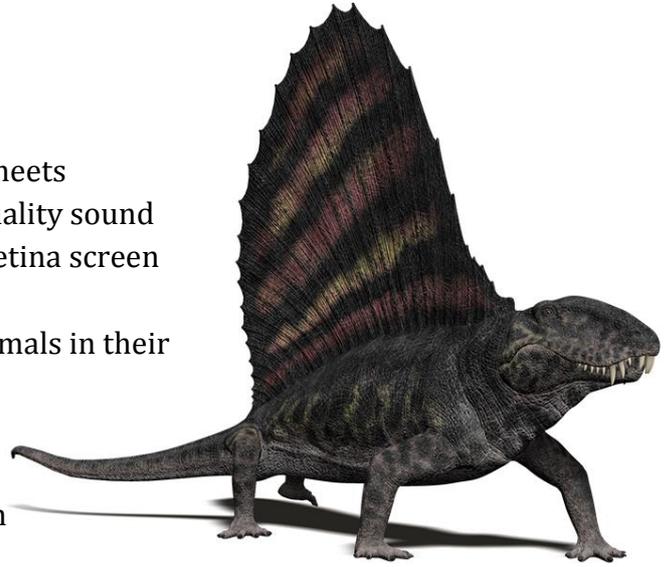

« Creatures from the past » is a revolutionary iPad application. It is an interactive encyclopaedia containing 60 extinct animals and high-quality pictures. You've never seen extinct animals like this before!

For each animal, you will find a descriptive sheet with HD pictures optimised for the Retina screen, 360° views, size comparisons with human beings (adult and children) and much more information.

Features:

- 60 extinct animals with detailed descriptive sheets
- Names of the animals read aloud with high-quality sound
- 60 interactive 360° views optimised for the Retina screen
- Almost 350 HD pictures
- 50 breath-taking HD pictures showing the animals in their natural habitat
- 60 HD pictures showing an animal and a man/child in order to compare their size
- A quick access area and a multi-criteria search area (period, diet)
- 2 languages available : English, French (Spanish soon)
- A simple interface, fully optimized for iPad

360° VIEWS

The application features 60 360° views which allow you to watch extinct animals from all angles.

Simple and optimized interface

The application has been optimized for children with a simplified interface, but the older ones will also be delighted! A quick access area allows you to list the animals according to simple criterias: age, alphabetic order, diet.
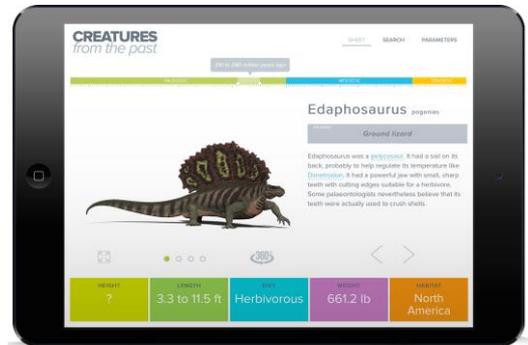

High quality photos
With Creatures from the past, you will discover high quality photos showing precisely animal's skin and color.

Detailed sheet
Each animal has a description sheet containing HD photos optimized for the Retina screen, 360° views, size comparisons with man (adult and children) and much more information.

Sécurité & Mode avion
The application contains neither ad nor external link, and the whole content is accessible by one single download. The application can thus be used in "Airplane mode" by children, without any Internet connection.
